

Papaul – African Beatbox

Papaul embraces the musical spirit of Africa with the urban soul of German dance culture & classic.

Created entirely from traditional African instrumentation and human beatboxing, they are a delicious blend of organic and electronic. Papaul melds the cultural backgrounds of Paul Brenning and Pape Dieye with an openness that demonstrates their influences and ability to connect musically. It's an album that takes you from the breaking waves of the western shore to riding camel back in the desert and then to dancing the night away in a discotheque.

With songs ranging from Latin grooves to Afrobeats to Hip-Hop and Drum n Bass, this is one album that will sink into your skin and show that music truly brings cultures together.
